OBJECTIVE A position in the field of Software Development with special interests in both Managing Development Teams and Developing.

EXPERIENCE *Full Stack Developer* November 2018 — Present
Mollie, Amsterdam, NL

- Working in the KYC and Interactions teams, focusing on both the Back-end and Front-end. Also doing Product Owner Tasks.
- Front-end development in Javascript (React with Redux, React-Native).
- Working closely with Design, creating new flows and improvements for conversion and retention rates.
- Back-end development (mostly a PHP (7.x) and MySQL stack, some services run Symphony and some Python).
- Working closely with Onboarding Risk and Compliance optimizing and securing processes.
- Integrating third party APIs for data processing and designing new implementations and refactorizations.
- Environment setup and Devops tasks (mostly GCP serverless).
- Lead the Engineer's Growth and learning at Mollie.
- Contribute to translating business goals into technical requirements for the team.
- Researching and implementing procedures, tools and systems where required to ensure key stakeholders/all business units being aligned at all times.

Technical Lead January 2017 — Present
Ananas, Amsterdam, NL

- Create and lead the development team in the company. Organize and prioritize tasks for the product development with Agile processes.
- Structure development team composition and define responsibilities.
- Responsible for development team performance.
- Align and manage all business processes and communication. with key stakeholders (designers, development team, project manager and business owner).
- Architect the system and develop in Javascript (React-native) and Node.js.
- DevOps tasks with AWS.

Team Lead & Full Stack Developer November 2016 — November 2018
Upinion, Amsterdam, NL

- Lead the development team in the company. Coach and organize a team of 9 international developers with Agile processes.
- Implement, align and manage all business processes and communication. with key stakeholders i.e development team, business owners, and clients.
- Responsible for ongoing process analysis and optimization where necessary.
- Responsible for development team performance.

- Researching and implementing procedures, tools and systems where required to ensure key stakeholders/all business units being aligned at all times.
- Front-end development in Javascript (jQuery, React and React-native) and Back-end in Node.js, PHP and Hack.
- Architect new implementations (mostly new services) and refactorizations.
- Environment setup and Devops tasks (AWS mostly with Docker).

Business Intelligence Consultant January 2016 — October 2016
SDG Consulting, Barcelona, ES

- Consultant and project manager, mostly designing and building planning platforms and financial reporting solutions. I worked directly with both the IT and Controlling departments of these companies.
- Gestamp **Project Management, Design, Development and Training**
- Mitsubishi Electric **Design, Development, Maintenance and Technical support**
- Interpartner (AXA) **Design and Project Management**
- Documenting software changes, program defects, testing program functionalities, patches, fixes.

Developer & Project Manager July 2015 — January 2016
Learnwus, Barcelona, ES

- Developer and project manager, designing and building e-Learning platforms.
- Sodexo **Project Management, Design and Development**
- Universitat de Barcelona **Project Management and Development**

Business & Software Developer January 2014 — June 2015
SIO Dental, Barcelona, ES

- Built SIO Dental, an Orthodontic Consulting company. In this project I worked mostly as a Business Developer, but I also built the platform. The service is being used by many small clinics around Barcelona.

Accounting September 2013 — September 2014
Eikonos, Barcelona, ES

- Accounting and implementation of a new ERP.

Intern September 2012 — September 2013
EcoIntelligentGrowth, Barcelona, ES

- I adapted the SourceMap API to work with the Access Database the company was working with and built some reporting tools with it.

EDUCATION

Bachelor in Computer Science Engineering September 2010 — January 2015
Universitat Oberta de Catalunya

Bachelor in Economics September 2008 — July 2014
Universitat de Barcelona

Note: I spent a year in Universiteit van Amsterdam on an Erasmus program.
